Innovative IT professional and military veteran with a strong foundation in full-stack development, IT support, and system security. Proven ability to streamline workflows, enhance system reliability, and deliver tailored software solutions. Eager to leverage technical and leadership skills to contribute to a forward-thinking organization.

PROJECTS

Netflix Clone:

[GitHub Repository](#) | [Live Demo](#)

- Built a movie browsing app using React, JavaScript, Firebase, and Stripe for user authentication and subscription payments.
- Integrated TMDb API to dynamically display categorized movie lists.

CRUD Zoology:

[GitHub Repository](#) | [Live Demo](#)

- Developed a CRUD application using C#, ASP.NET, SQL, and React.
- Enabled users to manage animal data in a database with real-time updates.

Ticketing System:

[GitHub Repository](#) | [Live Demo](#)

- Created a task assignment app with Node.js, Express.js, MongoDB, React, JavaScript, and Redux.
- Secured user roles and permissions to streamline organizational workflows.

PROFESSIONAL EXPERIENCE

IT Support

JUN 2023 – Present

Martin Supply, Florence, AL 35630

- Served as the primary point of contact for technical issues, providing timely and effective resolutions.
- Developed an application to automate common issue responses, reducing response times by 20%.
- Implemented software to manage domain assets and deploy scripts across devices.
- Contributed to the integration of multiple companies and the unification of ERP systems.
- Applied security features to ensure CIS IG1 and IG2 compliance.

Business Representative

JUL 2021 – JUN 2023

Colonial Life/Rocket City Benefits, Huntsville, AL 35801

- Managed the full sales cycle, from prospecting to closing, and provided post-sale support to clients.

Information Technology Technician

JAN 2016 – JUL 2021

Woodruff Produce, Decatur, AL 35603

- Recovered critical business data after a system failure, implementing backup procedures to prevent future data loss.
- Provided routine software maintenance and security updates to optimize desktop and laptop performance.
- Installed and configured Windows OS to meet business-specific needs.

Communications – Field Wireman

MAY 2012 – NOV 2015

1st Battalion 6th Marine Regiment, Camp Lejeune, NC 28542

- Programmed and maintained internal landline systems for leadership communication.
- Supported combat operations by implementing DSN and iridium services for remote communication.
- Created and maintained a database to assist in accounting for over \$880,000 of communications equipment.
