Front End: React, JavaScript, CSS, JSX/HTML **Back End:** C#, ASP.NET, SQL
- Created to practice the utilization of basic CRUD operations, learn the fundamentals of C#, and to experience the complete lifecycle of application development up to the deployment phase.
 - Allows users to add/edit/delete/view their favorite animals/animal classes into a SQL database, including images.
- Ticketing System:** Git: github.com/clintonhpat/BillieJeansAuto | Live: billiejeansauto.onrender.com/
Front End: React, Redux, JavaScript, CSS, JSX/HTML **Back End:** Node, ExpressJS, MongoDB
- Created to assist in assigning tasks to certain roles/employees within an organization, with focus on back-end security.
 - Allows users to create accounts which are assigned roles so that tasks can be routed to the correct individuals.

PROFESSIONAL EXPERIENCE

- IT Support** **JUN 2023 – Present**
Martin Supply, Florence, AL 35630
- Served as the initial point of contact for all technical malfunctions, providing timely and efficient support to resolve issues.
 - Demonstrated a high degree of motivation and the ability to work in a remote environment by efficiently managing help requests.
 - Implemented software to effectively manage/track all domain assets and to silently mass-deploy developed scripts across connected devices.
 - Played a pivotal role in ongoing efforts to integrate multiple companies and streamline the migration of diverse ERP systems into a unified platform.
- Business Representative** **JUL 2021 – JUN 2023**
Colonial Life/Rocket City Benefits, Huntsville, AL 35801
- Managed all phases of the sales cycle from prospecting to closing, including follow-up support with clients.
 - Conducted business meetings to determine the extent of present coverage, investments, and current pain-points with the employer’s benefit packages.
- Information Technology Technician** **JAN 2016 – JUL 2021**
Woodruff Produce, Decatur, AL 35603
- Performed hardware obsolescence and safely migrated critical business data on multiple desktops/laptops.
 - Implemented imaging procedures by backing up business information and setting up scheduled backups to ensure that a loss of information would not persist in the future.
 - Provided routine software security/maintenance on various desktops, laptops, and mobile devices.
 - Efficient with the installation, upgrading, and operation of Windows operating systems.
- Communications – Field Wireman** **MAY 2012 – NOV 2015**
1st Battalion 6th Marine Regiment, Camp Lejeune, NC 28542
- Programmed and established internal landline systems to ensure leadership communication through a remote access module.
 - Efficiently established reliable telecommunication services and helped plan and implement essential Defense Switching Network (DSN) and iridium services for all internal combat operations, center command, and control functions.
 - Created and maintained a database and established over 150 records of discrepancies to assist in accounting for over \$880,000 of communications equipment.
